PROFESSIONAL SUMMARY

Software Engineering student at Universidad EAM (Armenia, Colombia), currently in 7th of 8 semesters. Started in February 2024 and previously earned a Technical Degree in Software Analysis and Development from SENA. Passionate about engineering complete software products: from database design and server architecture to reactive, high-performance user interfaces.

Experienced Full Stack Developer proficient in TypeScript, NestJS, React, Next.js, relational/non-relational databases, containerization (Docker), cloud deployment (AWS EC2, S3), CI/CD pipelines with GitHub Actions, and system security. Known for strong technical leadership, rapid self-learning, thorough documentation, and effective use of AI tools to accelerate delivery.

WORK EXPERIENCE

Full Stack Software Developer · Universidad EAM — Innovation Lab

March 2025 — Present

📍 Armenia, Quindío (Hybrid / Remote)

Developing strategic institutional software products and bespoke solutions for external clients through the university innovation ecosystem. Active involvement across the full lifecycle: software architecture, backend, frontend, cloud infrastructure (AWS), CI/CD, testing, and technical documentation.

- Led end-to-end development of **Prospectiva 2050** (monorepo with NestJS backend, 3 React apps, and PostgreSQL), featuring multi-tier architecture, role-based access, dynamic content repository, and containerized AWS EC2 deployment via GHCR and Traefik.
- Built the corporate website for **Emdecob** using Next.js 14, TypeScript, and Tailwind CSS, featuring advanced technical SEO, headless content management, and service portals, deployed on Vercel/AWS.
- Contributed to the institutional platform **eam.edu.co** (academic programs, admissions, news, and student services).
- Engineered automation workflows for **ESSeguros** (external client): process orchestration, REST API integrations, and continuous deployment.
- Developed **Rural Adventure** (tourism portal) and **SOS Pets** (pet rescue and adoption platform).

`TypeScript` `NestJS` `React` `Next.js` `PostgreSQL` `Docker` `AWS EC2` `GitHub Actions` `Traefik` `Tailwind CSS` `Prisma`

PROJECTS PORTFOLIO

Prospectiva 2050 — Horizonte Quindío

Featured · Production

🔗 horizontequindio2050.com · 💻 GitHub

Territorial foresight repository monorepo. NestJS backend, 3 React apps, PostgreSQL, JWT role access, citizen inbox, and AWS containerized deployment.

`NestJS` `React` `PostgreSQL` `Docker` `AWS` `Traefik`

Emdecob — Corporate Website

Featured · Production

🔗 emdecob.com · 💻 GitHub

High-performance corporate site showcasing legal and contact center services. Technical SEO, zero-rebuild content management, and privacy compliance in Next.js 14.

`Next.js 14` `TypeScript` `Tailwind CSS` `SEO` `Vercel / AWS`

Universidad EAM Web Platform

Institutional

🔗 eam.edu.co

Institutional web platform for Universidad EAM: academic programs, admissions, news and student services. Collaborative frontend and UI/UX development.

`Frontend` `UI/UX` `TypeScript` `Web`

SOS Pets — Pet Rescue Platform

Community

💻 GitHub

Community platform for reporting, locating, and adopting rescue animals in Quindío, featuring category filtering and real-time status management.

`Next.js` `React` `Node.js` `PostgreSQL`

Rural Adventure — Quindío Tourism

Tourism

💻 GitHub

Innovation Lab software project focused on rural tourism, adventure experiences and route mapping in Quindío.

`React` `TypeScript` `Maps` `APIs`

ESSeguros — Process Automation

External Client

💻 GitHub

Business process automation and workflow orchestration for corporate client engaged through Universidad EAM Innovation Lab.

`Automation` `TypeScript` `Node.js` `APIs`

Branding Toolkit

In Development · Launching Next Week

Automated generator for brand guidelines, accessible palettes, typography, and design tokens exportable via Canvas & SVG. Currently in active development.

`TypeScript` `Canvas` `SVG` `Design Systems`

Destino Salento

In Development · Launching Next Week

Tourism & booking experience platform for Salento and Cocora Valley: coffee tours, trekking routes, and booking system. Currently in active development.

`Next.js` `Maps` `Booking` `TypeScript`

EDUCATION

B.S. in Software Engineering · Universidad EAM — **2024 — Present (7th of 8 semesters)**

📍 Armenia, Quindío, Colombia

Curriculum focused on software architecture, distributed systems, relational and NoSQL databases, data structures & algorithms, system security, and agile methodologies (Scrum).

Technical Degree in Software Analysis and Development · SENA (National Learning Service) — **2022 — 2023**

📍 Armenia, Quindío, Colombia

Structured and object-oriented programming, relational database modeling, frontend web development (HTML5, CSS3, JavaScript), Git version control, and unit testing fundamentals.

TECHNICAL SKILLS

Core Languages:	TypeScript (Advanced) · JavaScript (Advanced) · SQL · Python · Go (Basic) · Java (Basic)
Frontend:	React · Next.js · Astro · Tailwind CSS · Semantic HTML5 / CSS3 · Vite · Responsive Design
Backend & APIs:	Node.js · NestJS · Express · FastAPI · RESTful APIs · Microservices · WebSockets · JWT Authentication
Databases & ORMs:	PostgreSQL · Redis · Prisma ORM · Drizzle ORM · MongoDB
Cloud, DevOps & Tooling:	Docker · AWS (EC2, S3) · GitHub Actions (CI/CD) · Traefik · Linux / Bash · Git / GitHub · Vercel
AI & Automation:	Gemini API · OpenAI API · Prompt Engineering · n8n · MCP (Model Context Protocol)

LANGUAGES

Spanish: Native **English:** A2 Advanced (Fluent technical reading & writing; speaking and listening in continuous improvement)
